

HDi trolleys are proudly manufactured in Australia

Overview

The HDi Mobi series is proudly engineered and manufactured here in Australia to enable our customers to make the most out of their multi touch technology.

Designed and modified over the past 15 years, we believe the HDi range is the premium trolley on the market for mobile touch solutions.

The Mobi series offers the widest range of movement and flexibility to ensure every user gets the optimal use of their space.

The high quality steel construction and professional finish completes the most robust and versatile trolley series on the market in Australia.

The HDi Mobi Premium Mid Trolley offers a full range of electric height adjustment for the perfect presentation at any height to suit the audience and presenter, built to cater for medium sized screens.

Available to fit non-HDi screen technology.
