PREMIUM BYOM SOLUTION FOR HIGH-IMPACT ROOMS

AirServer Connect and Button enable flexible wireless conferencing in meeting spaces and boardrooms. The Connect Button automatically connects you to room devices like cameras, mics, and displays when you enter.

Start meetings from your laptop in seconds using your preferred video conferencing platform. With one click on the Connect Button, hybrid meetings are seamless for everyone.

FEATURE CALL OUTS (MVP):

- Operates without the need for any third-party software, apps, or drivers to be installed, allowing for seamless usability.
- Equipped with touchback functionality, the Button connects to the camera and can provide charging back to the PC device.
- Utilising USB-3 technology, it supports 4K 30 FPS for camera sharing and 4K 60 FPS for content sharing/screen mirroring.
- Effortlessly switch between desktop and camera modes as needed.
